1. Enclosed for your comments are eleven (11) proposals prepared by the CEQ (Council on Environmental Quality) as suggestions toward implementing the recent US/USSR Environmental Agreement signed in Moscow by the President. The subjects are: air, water, agricultural, urban, nature and preserves, marine, biological and genetic consequences, climate, earthquake prediction, arttic, and legal and administrative.

2. Our contact in CEQ points out that the attached is a rough draft. There may be, therefore, some changes made in both wording and substance. It is also by no means certain that all eleven proposals would be accepted. Nevertheless, as CEQ is operating under a short deadline it would appreciate our prompt response, including comments, on (a) degree of Agency interest in each proposal, and (b) whether the topic would tend to result in a US loss or a US gain.

3. It would be very helpful to CEQ if you could let us have the answers before close of business Tuesday, 8 August 72.

4. The attached material is our only copy and must be returned to CEQ. Would you please show it to the proper analysts in OER on a priority basis, then let OSI ([REDACTED]) do the same, and return the material to us. 25X1A 25X1A

[REDACTED]
have no objection to the 11 proposals prepared by the Council on Environmental Quality as suggestions toward implementing subject agreement. Both OSI and OER would like to receive further information on these proposals as they are received and feel that this agreement would tend to result in a US gain.
